SENATOR

AD-LIB TABLES

Looking at how people work, the Ad-Lib range has evolved and now offers new top shapes and sizes.

With technology at the forefront of the design; power, AV and USB outlets

are conveniently located under the desk surface and accessed through an easily removable polished acrylic cable access tray which sits neatly on a cable tidy porthole. The tables feature an
innovative tech knit sock which also acts as cable management when used with an integrated power module.

DESIGN
PearsonLloyd

The London based practice takes a collaborative approach to its work, embracing the restrictions imposed by production, the market and all the other factors that define a brief. Their work is grounded in research and at the core is

an attempt to understand the relationship between a product, its place, and the way people use it. It is this innovative thinking that earned PearsonLloyd a Red Dot Award for the design of Ad-Lib for Senator.

LCA reports can be downloaded from the Group Portal and Website.

SENATOR 3 R'S

Senator is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R's principle

-Reduce, Reuse and Recycle.

Whilst recycling is the element which receives the most exposure it is actually the last option available and should never be the prime target in anyone's battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to **Reduce** usage. Then we should look to **Reuse** wherever possible and finally, only after these two processes have been exhausted, should we consider **Recycling.**

**Reduce
Reuse
Recycle**
